Developing DSX Camo - Behind the Scenes

When I was asked to design a camo pattern for XENEK's new Ascent ground blind, I was honored and stoked! I had been using their blinds for a few seasons and I absolutely LOVE the endless options of window configurations and visibility. But, I knew there was room for improvement in ALL camouflage solutions for ground blinds, so I was eager to get started.

My primary goal was to make the pattern open and broken-up, so the blind wouldn't become a dark blob. To accomplish this, I carefully selected a color palette that would blend into environments that ranged from dense spring foliage to the stark landscape of winter. Then, I distributed those colors in a pattern with light and dark background bands, that cause the viewer to look "through" the blind. This visual deception makes the blind highly effective for deer, antelope, elk, turkeys, and predators.

This fall, I had the privilege of putting the DSX pattern to work in my home state of Oregon where I took two large Pope and Young Columbian Blacktails out of my XENEK blinds. As an artist, I'm thankful for the opportunity to finally lend a creative hand to something I've been passionate about for many, many years.

BLIND FEATURES

- Lifetime Warranty on rods and hub assemblies
- Patented window system that includes highly adjustable panoramic and vertical window styles
- One-way vision panels strategically located to maximize vision and minimize light and scent exposure
- 4-way stretch window doubles as an oversized silent entry door
- Brush loops from the roof to the ground to maximize camouflage options
- Proprietary wall and hub adjustment strap
- Self-Healing tripod slots free up space & improve tripod function
- 10 accessory mounting locations for quick attachment of ground blind accessories
- Tight, silent, Velcro-free shoot through screens
- Enclosed backpack to carry everything you need for an all-day sit

ASCENT Blind Item #'s:

- 1000-GB-DSX (DSX Camo - Pictured)
- 1001-GB-VERDE (KUIU Verde 2.0 Camo - Not Pictured)

BLIND SPECIFICATIONS

- 72" x 72" (at hubs) x 73" tall
- 58" x 58" (footprint)
- 25 Pounds
- DSX camouflage, designed in collaboration with Dave Smith, founder of Dave Smith Decoys
- 600D Polyester fabric with heavy duty fabric reinforcements throughout
- Black polyurethane internal coating for extreme blackout
- Solid fiberglass rods
- Steel hubs and rod ends
- Heavy Duty Aluminum Y-Stakes

The SNIPER Ground Blind

Precision Windows | One-Way Vision Panels | All Sides

Strategically Located One-Way Vision Panels

Top and Bottom Window Height Adjustment Panels

Vertical Windows Reversible from Camo to Black

BLIND FEATURES

- DSX camouflage, designed in collaboration with Dave Smith, founder of Dave Smith Decoys
- Lifetime Warranty on rods and hub assemblies
- Vertical window system designed to maximize shot opportunities while minimizing hunter exposure
- Adjustable window panels enable users to create desired window sizes at all window elevations
- One-way vision panels strategically located to maximize vision and minimize light and scent exposure
- Brush loops strategically located to camouflage the blind
- 10 accessory mounting locations for quick attachment of ground blind accessories

SNIPER BLIND ITEM #:

- 1020-GB-DSX

BLIND SPECIFICATIONS

- 72" x 72" (at hubs) x 73" tall
- 58" x 58" (footprint)
- 21 Pounds
- 300D Polyester fabric with heavy duty fabric reinforcements throughout
- Black polyurethane internal coating for extreme blackout
- Solid fiberglass rods
- Steel hubs and rod ends
- Heavy Duty Aluminum Y-Stakes

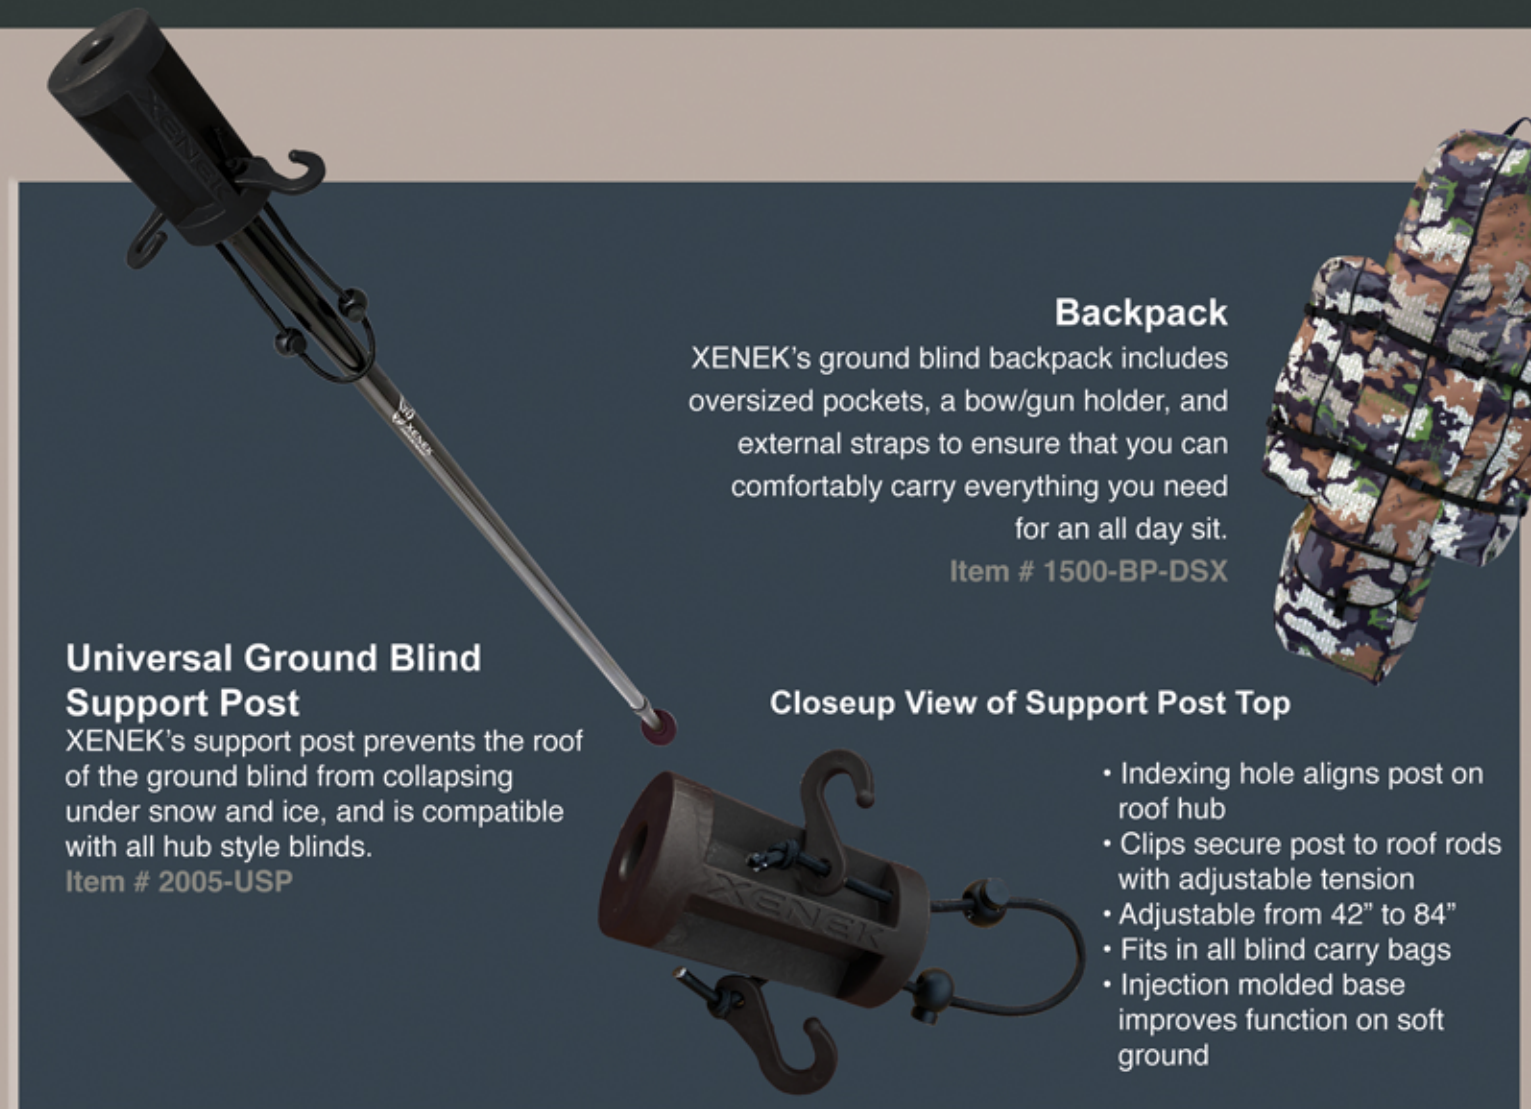

Bow Hanger

XENEK's ultra-light, compact bow hanger installs in seconds in ALL XENEK ground blind hubs. The rubber coated hook fits all bows.

Item # 2004-BH

GROUND BLIND ACCESSORIES

Universal Ground Blind Support Post

XENEK's support post prevents the roof of the ground blind from collapsing under snow and ice, and is compatible with all hub style blinds.

Item # 2005-USP

Closeup View of Support Post Top

- Indexing hole aligns post on roof hub
- Clips secure post to roof rods with adjustable tension
- Adjustable from 42" to 84"
- Fits in all blind carry bags
- Injection molded base improves function on soft ground

Backpack

XENEK's ground blind backpack includes oversized pockets, a bow/gun holder, and external straps to ensure that you can comfortably carry everything you need for an all day sit.

Item # 1500-BP-DSX

CAPTURE THE HUNT

From a Bow | From a Blind | From a Tree

Mini-Mount & Universal Phone Adapter
(Inside of Ground Blind)

Tree Screw &
Mini-Mount

Stabilizer Coupler, Mini-Mount,
& Universal Phone Adapter

Item # 2201-MMTS
Tree Stand Combo

Film your treestand hunts or set up your game cameras with unlimited adjustability with this combo.

Item # 2202-MMSC
Bow Combo

Quickly turn your bow into a mobile studio with this combo. Compatible with all stabilizer mounting locations.

INDIVIDUAL COMPONENTS

XENEK Mini-Mount - Unlimited Connections - Item # 2000-MM

This compact, lightweight camera mount installs in seconds, and enables you to film your hunt with everything from your cell phone to Point of View cameras. It's also a great tool for mounting ozone machines, LED lights, and any other accessory that utilizes a standard 1/4-20 thread.

Universal Phone Adapter - Keep Your Cell Phone Handy - Item # 2001-UPA

XENEK's Universal Phone Adapter allows hunters to attach their cell phone to the XENEK Mini-Mount or a tripod. The Universal Phone Adapter quickly adjusts to securely clamp onto every size of smart phone on the market.

Tree Screw - No-Tools-Required-Installation - Item # 2002-TS

The Tree Screw provides a "no tools required" method of installing the Mini-Mount into a tree to film your treestand hunts or to mount your game camera with unlimited adjustability.

Stabilizer Coupler - Turn Your Bow Into a Mobile Studio - Item # 2003-SC

The Stabilizer Coupler provides 4 separate mounting locations for the Mini-Mount on compound bows. It attaches close to the riser of the bow to reduce vibration in the camera at the shot and to keep the effects of any added weight to an absolute minimum. This part is compatible with all stabilizers and can also be used without a stabilizer.

COMBOS & BUNDLES

Item # 2300-FYH-TS
Tree Stand Bundle

This bundle turns every tree into a stable, hands-free mounting location for your cell phone. Great for filming your treestand hunts and for timelapse and self timer modes.

Item # 2301-FYH-BOW
Bow Bundle

Thread the Stabilizer Coupler into the front or back stabilizer hole of the bow to create multiple mounting locations for the mini-mount and your cell phone. The Coupler is threaded to accept a stabilizer if you want additional stabilization for your setup.

Item # 2302-FYH-BLIND
Blind Bundle

All XENEK blinds have 10 built-in locations to attach this bundle to. It weighs just a few ounces, fits in your pocket, sets up in seconds, and provides hands free cell phone usage in the blind.
